

# YES ON 1

When RNs have too many patients to care for, we see a dramatic and dangerous impact on safety and patient outcomes. Study after study shows that there is an absolute need to set a maximum limit on the number of patients that can be assigned to each registered nurse in order to avoid serious complications, mistakes, and preventable readmissions.

**SAFE PATIENT LIMITS**  **SAVE LIVES**

We believe that women should receive the best-quality healthcare. When nurses have too many patients to care for, it impacts the safety of all patients. Ensuring nurses' workload is appropriate to deliver consistent high quality and attentive care is of importance to Rosie's Place.

*We believe that women should receive the best-quality healthcare. When nurses have too many patients to care for, it impacts the safety of all patients.*
